# The Outer Banks of North Carolina

September 25 - 27, 2009

**Feline FAQ's- answers to frequently asked questions**

with

**Lynelle Johnson** D.V.M

Diplomate, American College of Veterinary Internal Medicine

**David Maggs** B.V.Sc.

Diplomate, American College of Veterinary Ophthalmologists

University of California, Davis

**The Outer Banks:** Part of the Outer Banks's charm is the remoteness of the area. Since it's accessible only by ferry or by driving over one of the bridges that connects it to the mainland, once you're here, you feel far removed from the rest of the world. But it's really not that far. Join us in Duck as we venture for the first time onto this spectacular set of islands.

The Sanderling Resort & Spa on North Carolina 's Outer Banks touches the shores of both the majestic Atlantic Ocean and the serene Currituck Sound. Located near, Duck, N.C., This North Carolina resort, The Sanderling, with its luxurious spa overlooking the sound, is the Outer Banks only true resort. Its unique natural environment and secluded ocean beaches offer guests an exclusive setting in which to relax and unwind. Quite simply, The Sanderling is the ultimate Outer Banks vacation spot.

The low-rise, cedar shingled buildings that comprise the resort pay homage to the traditional building forms of coastal North Carolina, and provide guests with luxurious accommodations, a lavish spa, first-class conference facilities and a variety of memorable dining experiences, putting together the perfect North Carolina vacation.

Offering miles of unspoiled ocean beach just 5 miles from the charming village of Duck and adjacent to the Pine Island Audubon Sanctuary, The Sanderling is truly unique. As our guest, you'll appreciate what seasoned travelers have always known-the enjoyment of a destination is often increased by its separation from the ordinary at this North Carolina resort.

### RECREATIONAL ACTIVITIES:

#### RECREATION

- SPA & FITNESS CENTER
- GOLF
- AUDUBON SANCTUARY
- ART COLLECTION
- ECO CENTER
- TENNIS
- LOCAL ATTRACTIONS
- SPECIAL EVENTS

The Sanderling offers a number of on-site recreational amenities, highlighted by a luxurious spa and a fully-equipped fitness center. Guests may also enjoy an indoor swimming pool, swim spa and Jacuzzi. During warm weather months, our Eco-Center is open to assist guests in their explorations of the Outer Banks

natural environment.

Nearby recreational amenities open to guests of The Sanderling include championship-quality golf courses, the Pine Island Indoor Racquet Club, a seasonal outdoor swimming pool, and the 3,400-acre Audubon Sanctuary.

Five miles from The Sanderling, the village of Duck offers unique shops and galleries specializing in art and crafts.

**The Sanderling is located on the Outer Banks of North Carolina, at the mid-point of the Atlantic Coast of the United States with easy access via major north-south and east-west interstate highways.**

How to get there:

Continuing education

## **Feline FAQ's- answers to frequently asked questions**

with

**Lynelle Johnson D.V.M**

**Diplomate, American College of Veterinary Internal Medicine**

**Associate Professor of Medicine**

**David Maggs B.V.Sc.**

**Diplomate, American College of Veterinary Ophthalmologists**

**Associate Professor of Ophthalmology**

**University of California, Davis**

**Dr. Johnson is an internationally recognized expert on respiratory medicine. Lynelle contributes to all the major veterinary texts and is a frequent speaker at both the national and international meetings. Lynelle is a frequent IVS speaker, where she has presented practical seminars**

**Dr. Maggs expertise at presenting practical and informative seminars has led to invitations to speak throughout the nation. He also contributes to the veterinary texts and is also a consultant for online services.**

**Both Drs Johnson & Maggs work with practicing veterinarians daily and have vast experiences that enable them to distill the questions from their general practitioner colleagues into short practical answers. We have all been to meetings where you already know 45 minutes of the material in a 50 minute lecture but have to wait until the very end to get the new information! In this seminar series, Drs. Johnson and Maggs have identified approximately 4-6 frequently asked questions to be answered per lecture session.**

Those questions will then be answered succinctly in approximately 10 minutes per question to allow for time for discussion amongst the group. The pace is rapid and so the CE is never boring!

**Dr. Johnson:**

- *Examining the Feline Patient*

What are some auscultation tips?

Can I really detect abnormal lung sounds?

What are the common abnormal breathing patterns?

Is it heart or lung disease?

*How should I manage*

*those sneezing, snotty-*

*nosed Cats*

How I manage chronic feline rhinitis

Is there an easy way to diagnose and manage nasal masses: Cryptococcus and neoplasia?

*Tracheobronchial Disease*

How to manage a coughing cat

You can do a tracheal wash- with video

Managing chronic tracheobronchial disease

What to do with bordetellosis in cats

What is the latest in the management of feline asthma and chronic bronchitis

*Lung Disease*

How do I differentiate bacterial & interstitial pneumonia?

What are my first choices in respiratory drugs?

Some tips on respiratory therapy

When to provide oxygen supplementation

*Pleural Disease*

What are my first tests for pleural diseases?

How I perform an atraumatic thoracocentesis

When and how to place a chest tube

Can chylothorax be managed?

What to do with pyothorax and FIP

*Respiratory Emergencies*

Where is the problem?

Initial management of respiratory distress

Dealing with laryngeal paralysis

Why is this cat blue?

**Dr. Maggs:**

- Examination Techniques and Ophthalmic Diagnostics

How can I do a better eye exam?

What are the secrets for detecting ophthalmic lesions?

The Tonopen - at last measuring IOP is easy

What's the best test for feline herpesvirus?

When should I culture the conjunctiva or cornea?

Can I do my own ophthalmic cytology?

- Ophthalmic Surgery

What instruments do I need for ophthalmic surgeries?

Are there special techniques that will make me a better ophthalmic surgeon?

Conjunctival grafts: Why, when and how?

- Surface ocular disease

Itchy skin, swollen eyelids, what next?

Why is this cornea opaque

What does it mean when the cornea turns blue?

How deep is that ulcer?

Three reasons a corneal ulcer won't heal

Feline herpesvirus: new treatments for a frustrating disease

Why are there blood vessels on this cornea?

- Intraocular disease

What diagnostic testing should I do for this cat with uveitis?

Which steroids should I use for uveitis?

Should I get an aqueous sample and how do I do it?

- Retinal disease

I wish I was better at the fundic exam - here's how.

There's so much variation in fundic appearance - what's normal?

How do I detect retinal detachments?

Anisocoria - pupils that teach

Feline hypertension - at last there's a detached retina we can treat!

Is this eye trying to tell me that the whole patient is sick?

- Ophthalmic Emergencies

When is it a real emergency?

How do I suture eyelid lacerations so that they heal well?

This eye is perforated - is there anything I can do?

Why did this patient suddenly go blind?
