## Ophthalmology in general practice

with

**David Maggs** B.V.Sc.

Diplomate, American College of Veterinary

Ophthalmology

Univ. of California - Davis

**Alison Clode** D.V.M.

Diplomate, American College of Veterinary

Ophthalmology

North Carolina State University

(Approved for 16 CE hrs by the AAVSB RACE program)

## Toronto 101

Every city has a story and Toronto's is written by the people - in several languages, in poetry, in song, in sidewalk art, in restaurant menus, in architectural blueprints, in scientific discoveries - even in legislation. Toronto is a city built with and for the limitless imaginations of the people who come here to live and those who come here to visit.

**Here you'll find a crash course in the creative city** - everything you need to get here, and blend in with the locals once you arrive

**Venue:**

## **Intercontinental Toronto Yorkville**

**220 Bloor St West, Toronto**

**Group room rate:**

**King Superior room: CAN \$259.00 dbl/night**

**plus Provincial Sales tax (5%) & Federal GST (5%) Local tax (3%)**

**(the GST is refundable to non-residents)**

**Please call 1-800-487-5650 to book your room at the group rate**

**Cancellations: No penalty if you cancel at least 7 days prior to your arrival. There is a one night penalty if you cancel within 7 days of your scheduled arrival. Please call 800-487-5650**

**InterContinental Toronto Yorkville is in the exclusive Yorkville neighbourhood known as the heart and soul of the city. Fashionable restaurants, trendy shops and premier galleries abound, as do cultural icons such as the Royal Ontario Museum, the Gardener Museum and the Bata Shoe Museum. Within a few miles are CN Tower and the Distillery District.**

**[Click here for a concierge tour of the area](#)**

Continuing education:

**Ophthalmology  
in general practice**

with

**David Maggs B.V.Sc.**

**Diplomate, American College of Veterinary**

**Ophthalmology**

**Associate Professor of Ophthalmology**

**Univ. of California - Davis**

**Alison Clode D.V.M.**

**Diplomate, American College of Veterinary**

**Ophthalmology**

**Assistant Professor of Ophthalmology**

**North Carolina State University**

**This course will update you on the recent diagnostic and therapeutic breakthroughs for *the most common canine and feline ophthalmic problems* using a combination of didactic and case-based teaching.**

**Both Dr. David Maggs and Dr. Alison Clode work in very busy clinical practices at their universities. This means that there is a very good chance that they have seen it and attempted to treat it!**

**Both speakers are well published and have presented at many of the national meetings and David is also an accomplished international speaker. Both David and Alison have promised me that the seminars have been structured to maximize the clinically relevant material that you will take with you to your practice.**

**The topics:**

**• Examination Techniques and Ophthalmic Diagnostics**

**How can I do a better eye exam?**

**What are the secrets for detecting ophthalmic lesions?**

**The Tonopen - at last measuring IOP is easy**

**What's the best test for feline herpes virus?**

**When should I culture the conjunctiva or cornea?**

**Can I do my own ophthalmic cytology?**

**. Ophthalmic Surgery**

**What instruments do I need for ophthalmic surgeries?**

**Are there special techniques that will make me a better ophthalmic surgeon?**

**Eyelid tumors - to cut or to freeze, that is the question.**

**Entropion surgery - from Shar Peis to Labradors**

**Which surgical technique is best for "cherry eye"?**

**Conjunctival grafts: Why, when and how?**

**. Surface ocular disease**

**Itchy skin, swollen eyelids, what next?**

**Why is this cornea opaque**

**What does it mean when the cornea turns blue?**

**KCS - not just cyclosporine**

**How deep is that ulcer?**

**Three reasons a corneal ulcer won't heal**

**Can I do a grid keratotomy in my practice?**

**Feline herpesvirus: new treatments for a frustrating disease**

**Why are there blood vessels on this cornea?**

**. Intraocular disease**

**Is this glaucoma primary or secondary?**

**Drugs for glaucoma - not just Timolol any more.**

**Should I do an intravitreal injection of gentamicin?**

**Is this nuclear sclerosis or cataracts?**

**When should I refer this dog for cataract surgery?**

**What diagnostic testing should I do for this cat with uveitis?**

**Which steroids should I use for uveitis?**

**Should I get an aqueous sample and how do I do it?**

**. Retinal disease**

**I wish I was better at the fundic exam - here's how.**

**There's so much variation in fundic appearance - what's normal?**

**How do I detect retinal detachments?**

**I know this dog is blind. I want to know if there is anything that can be done for him.**

**Anisocoria - pupils that teach**

**Feline hypertension - at last there's a detached retina we can treat!**

**Is this eye trying to tell me that the whole patient is sick?**

**. Ophthalmic Emergencies**

**When is it a real emergency?**

**How do I suture eyelid lacerations so that they heal well?**

**Acute congestive glaucoma - which drugs, which routes, how often?**

**This eye is perforated - is there anything I can do?**

**Why did this patient suddenly go blind?**

## Seminar Schedule
